

Parker Barrett

Web Designer and Developer

Seattle, WA | hello@parker-barrett.com
parker-barrett.com | [LinkedIn](#)

Web designer and developer with paid project experience building custom websites for creative clients in 2026. Projects include artist websites with audio playback and a Next.js portfolio with contact-form validation.

Project Experience

Parker Barrett | Developer portfolio

parker-barrett.com

- Designed and built a responsive portfolio with Next.js App Router, React, TypeScript, reusable components and custom CSS.
- Added browser and server validation for the contact form, including a honeypot and limits on request size and frequency.
- Configured metadata, social previews, canonical URLs, robots.txt and a sitemap, plus the Node.js startup file for cPanel hosting.

Centralia | Independent album website

centralia.cc

- Built an artist website in HTML, CSS and JavaScript to present music, videos, images and lyrics.
- Added audio that continues during section navigation, video playback, an image lightbox and page-specific sharing metadata.

FULLMOON100X | Commissioned artist website

fullmoon100x.com

- Built a responsive HTML, CSS and JavaScript site with content stored in one editable JavaScript data file.
- Added audio playback across section navigation, an image lightbox and browser Back and Forward support.

Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js

Implementation: Responsive layouts, media players, form validation, semantic HTML, ARIA labels and reduced-motion support

Delivery: Page metadata, social previews, cPanel deployment setup, AI-assisted development with Codex
